The "Auto CalPro" System Eliminates the Challenges and Frustrations of Video Display Calibration with Automatic and Guided Procedures...

Produces Perfect Pictures Every Time.

ACP6500 "Auto CalPro" Calibration System

ISF-DAY   VD2-

IN2

**Automatic 10-step Pre and Post Calibration Capture on ALL displays!**

"The Auto CalPro Maximizes the Capabilities and Performance of the VP40x Multimedia Video Generator and CP5000 ColorPro with fully automatic and guided video display calibration."

The ACP6500 'Auto CalPro':

- Delivers automatic video display calibration on selected chassis with the click of a mouse.
- Calibrates video displays to produce picture perfect images to manufacturer specifications in minutes.
- Provides automated guided-process video calibration on any video display by automating the video generator and color analyzer functions.
- Simplified user interface and easy-to-interpret chromaticity diagrams take the guesswork out of video display calibration.
- Guided calibration procedures with simplified application pointers help you quickly and accurately calibrate every video display. Helps you calibrate like a pro the first time and every time.
- Easy-to-create calibration reports demonstrate to your customer how their display performed before and after calibration.
- Pre- and post-calibration gamma report shows how closely the video display performed to ideal.
- Obsolete proof system. As new manufacturers and chassis are added, you can perform automatic calibration on a growing list of video displays.

Here is how the System works…

Chassis in the Auto-Calibration Database
1. Click 'Start'
2. The Auto CalPro guides you through pre-calibration video display setup
3. The Auto CalPro, with the CP5000 Color Analyzer and VP40x Video Generator automatically white balance the video display step (the CalPro automatically selects the video pattern and takes luminance and chromaticity readings when needed)
4. The Auto CalPro automatically generates a pre- and post-calibration report

Chassis not in the Auto-Calibration Database
1. Click 'Start'
2. The Auto CalPro guides you through pre-calibration video display setup
3. The Auto CalPro walks you through each calibration step of the calibration procedure with application guidance at each step (the CalPro automatically selects the video pattern and takes luminance and chromaticity readings when needed)
4. The Auto CalPro automatically generates a pre- and post-calibration report.

Here are the components in the Video Tool Suite…

The ACP6500 Auto CalPro software

USB to Serial port expander
supplied with the ACP6500

CP5000 ColorPro All-Display Color Analyzer
(also available with USB connectors)

CC307 Video tool suite case

A VideoPro Generator from the VP40x family
(VP400, VP401, VP402, or VP403)
